Integrating sustainability accounting into higher-education curricula

The Erasmus+ project Account4GreenEco (Ref. 2022-1-ES01-KA220-HED-000089844) aims to develop an online learning environment that will facilitate students to become competent sustainability accounting professionals aiding firms in meeting the EU sustainability information requirements and support the green transition of the EU economy.

The project will last for three years, starting from December 1, 2022, and consists of a multidisciplinary partnership comprising higher education institutions and a technological partner from four different countries. The project is coordinated by the University of Burgos.

The opinions and views expressed in this material are those of the authors (partners of the Account4GreenEco Project: University of Burgos, Università degli Studi di Trento, Leuphana University Lüneburg, MBS School of Business, and Gestionet) and do not necessarily reflect those of the European Union or the Spanish Service for the Internationalisation of Education (SEPIE). Neither the European Union nor the SEPIE National Agency can be held responsible for them.
